About This Software

The Marvellous Machine is not a roller coaster ride, it's a fifteen minute narrated journey in VR that lets you explore the inner workings of your mind and experience new perspectives.

Get yourself into a playful mood, and just go and have fun exploring! Lay aside any preconceived ideas of what you can experience and what you're capable of. In the realm of the mind you are only limited by what you think is possible. But please be true to yourself - if you are not truly willing to let go of yourself for a while and follow the narrator's directions closely, this experience will not be for you.

Really fun chaos. Playing alone kinda sucks cause low player count = high ping = lot of bugs. The map editor's pretty good though, and there's a lot of really fun guns. It's like Gang Beasts but cheaper and a lotta fun with LAN. Overall I've just had a blast playing with friends and recommend this to anyone who has anyone to play with.. The primary grievance I have with this game is during some of the trials others are always given unfair advantages even if you did everything right. And sometimes (maybe due to scripting errors), you don't receive the rewards you are promised at all! Also the male romance options are less than female ones and they are not attractive both in personalities and appearances, that is so unacceptable considering the LGBT and gender equality policies Choice of Games and Hosted Games always seem to advocate in their game descriptions.. Really helpful for completionists and achievement hunters. Also it's a great way to get OVERPOWERED. This is a fun arcade game with a feeling of lighthearted progression and intense multiplayer action especially if you can just get freinds together this game is great. Not many maps as of yet and only a few planes. Great music Fun bots to play aaround with and a hard time trail test make the game worth it for the money and good to just pull out and play anytime without long loading screens.. The idea wasn't that bad, unfortunately too much of the gameplay relied purely on luck - i recall winning against top leaderboard players simply because i've got few lucky crate drops with nukes in them. Eventually i got on top myself but then stop playing it all together. It wasn't very popular or frequently updated and it was never properly balanced.

I suppose it could be fun if you got few friends that want to play it with good internet connection and low latency.. A hidden gem amongs the many FPS games out there, although the checkpoint system is really weird but the game is fun and challenging so I let it slide.

I love the Escapist games and the feeling of being chased and having the perfect plan. The only problem I had with the games was the crafting system. Take the crafting system and erase all planning and replace it with pure action. I do not like this.. really good puzzles and fortunately is better than number 1

10/10 this one. The game is pretty fun but not worth to buy, the game contains only one level or killing 30 out of 30 monsters. After class\weapon selection you have to try the weapon first or kill the first monster (confusing) before it will start the game (need to wait a min). Well if the developer will enhance the game in terms of stage level and other stuff.. Don't do it.

Got it for \$.99 thinking it's just a dollar. That money would have been better off in the trash.

Controls are terrible, gameplay in general is crap. It's 2016 and there's no episode 2 for obvious reasons. Ain't worth it.. I want to give it neutral but there is no option like that so i make up %51 :)

Nobody needs skyrim but if u make something like that make it a little bit longer.

quick finish quick refund.
